An Lienosis Dysenteria Salutaris?

226

Dysenteria siue saniem per cruentâ per aluum excretionem quocunq; tandem illa modo, et undecunq; fiat [illegible] habent, quinq; sui causâ agnoscit, hepaticæ [illegible], eiusdem expressionem, symptomaticam expressionem, vacuationem periodicam, et criticam excretionem, quarum quæ prior est a purgandi [illegible] hepate scilicet et sua naa vel primum, vel et per se, vel aliunde procul ægrotis: ac primum quidem et per se [illegible] quibus vel a parentibus [illegible], vel [illegible], vel simul [illegible] diætas [illegible] intemperie calida, frigida, humida, sicca, et et his composita, aliunde vero [illegible] –ucum diætas [illegible] olim institutas in prauam mutatio, profusa narium hæmorrhagia, profluuium muliebre, hæmorrhoides [illegible] proruptas, [illegible] phlebotomia, Balnea intempestiua, fotus [illegible] quibus cum omnia [illegible] naa præsidia labefactentur, tum maxime robur hepatis adeo [illegible] –icit, et exoluitur, ut vix possit in sanguinem laudabilem chylum conuertere, aut [illegible] et in reliquas corporis partes demandandum retinere, unde feculenta illa [illegible] sanioso, minimoq; grumosus [illegible] moxque atq; torminibus intestinorum [illegible]; corpus atrophia breui contabescit, tandemq; mors [illegible] consequitur, nisi mature ac priusq [illegible] styptica remedijs, ac [illegible] quæ sanam hepati conform– ando [illegible] tam sumptis, q admotis huiusce dysenteriæ calamitosæ [illegible] offerantur.

At visceris autem expressionem quam facit non quidem semper humoris biliosi aut pituitosi, [illegible] contumaci obstructione prohibetur exire colluuies (ut solet aliud) sed vel hæmorrhoidarum solitarum in hæmorrhoicis, vel menstruorum familiarium in mulieribus suppressio, dysenteriæ quoq; species alia [illegible] confusione nonnunquam, [illegible] ante in hypocondrio dextro grauitate, præterea lumborum [illegible] dolore, tarda parcaq; nimis [illegible] sanguinis excretione dignoscenda, quæ [illegible] diu magnoq; ægrorum tædio [illegible], nisi per liberalem sanguinis missionem onere tanto grauata naa subleuetur.

Expressionem Symptomaticam planeq; dysentericam gignit sæpissime flaua bilis [illegible] in aluum [illegible] post frigida [illegible] præcedentis anni constitutionem [illegible] quæ constantem [illegible] aquam in meridionali [illegible] ciuitatis [illegible] nonnunquam [illegible] capite in [illegible] et intestina delatâ pituitâ putrida, et salsa [illegible] calidior [illegible], et [illegible] tempestas [illegible] putredinis [illegible] aquilonam [illegible] et australe [illegible] Bilis atra [illegible] phlegmone [illegible] febrium tabificarum colliquamenta: In quibus postremis dysenteriæ [illegible] nulla vitæ salus [illegible] esse potest, sed concitatâ aut consistente flaua bilis aut salsæ pituitæ fluxione [illegible] statim initio [illegible] cholagogo, caput phlegmagogo purgetur, corpore [illegible], febreq; [illegible] fluxio [illegible] –datur, aut per urinas, vomitumq; [illegible], aluus lacte cocto sæpe [illegible]; [illegible] per os assumatur, reliquum corpus pro varia symptomatum ratio– diligentissime curetur, [illegible] denique; [illegible] potest, ne fiat prohibeatur, aut factum primo detergentibus, post astringentibus, et consolidantibus ad cicatricem perducatur.

At vero salutaris et periodica puri sanguinis per intestina vacuatio [illegible] hepatis, fortemq; naa contentionem [illegible] et [illegible] –alites, nec ad multum tempus producatur. nec in ea (ut in cæteris [illegible] dysenteriæ [illegible]) cibos fastidiant ægri, doloris [illegible] nulla suspicio, [illegible] absq; ulla alia arte parata vacuatio [illegible] expectanda. talis solet [illegible] ac iuuenibus si forte [illegible] hæmorrhagia [illegible] potissimum accidere, et et iis qui ad [illegible] pedefracti sed parte saucia [illegible], ut sit illa semper [illegible] sublato phlegmone [illegible] –ooos. talis denique esse qui alterum crure, vel brachio [illegible] mutili nullam solum partem [illegible] victu quotidiano [illegible].

Humoris porro morbifici critica per dysenteriam excretio [illegible] in senibus acutâ febre correptis, nonnunquam in schirroso hepate a suppressis aliquot annos mulierib' nato, aliquando etiam in lumborum gibberis a tuberculo [illegible] salutaris existat, tum in lienosis quib' congesta [illegible] pituita aut melanch' humor in hypocondrio læuo tensum, durum, [illegible] calor ac pustulis partium inferiorum, superiorum vero [illegible] quoq; [illegible] frigore [illegible] concitatam [illegible] salutis potissimum com– [illegible]: [illegible] cum et lienis redintegratione, et [illegible] humorem a sanguine segregandi pristinam affert libertatem nec lienteriam aut hydropem insanabilem inducat, [illegible] quæ non nuda intestinorum [illegible], sed et malignâ humorum [illegible] putredine [illegible] habere coniunctam.

Ergo Lienosis Dysenteria Salutaris.

Proponebat Gaspar Brayer Castrotheodoricus anno 1589.
